PROFESSIONAL SUMMARY

Application Consultant / Application Support Engineer with 7+ years combined experience in API support, operational automation, and software delivery. Currently supporting a major telecom client delivering Python-based automation integrated with AWS services. Previously transitioned internally from L2 support into QA automation and full-stack development through company-sponsored training and hands-on project delivery. Strong capability troubleshooting production issues, building workflow automation, and improving operational efficiency.

WORK EXPERIENCE

NCS Group - Application Consultant

March 2023 – Present | Dublin, Ireland (Remote with PH client)

- Deliver Python workflow automation in an official Globe Telecom rollout project, automating business workflows triggered via frontend requests and backend APIs.
- Integrate AWS (API Gateway, Lambda, SQS, EC2, SNS) and Google Sheets API to reduce manual operational tasks.
- Apply Agile/Scrum, participate in code reviews, and manage changes in GitLab.
- Previously worked on React + Java Spring Boot components via internal full stack training and delivery pipeline.
- Previously delivered QA automation with Selenium + Java to improve regression test coverage.
- Originally an L2 Application Support Analyst supporting REST APIs (Globe Telecom), AWS CloudWatch, Athena, DynamoDB, Jenkins.

ANTlabs - Service Desk Engineer

January 2020 - March 2023

- Supported deployment and ongoing operations of the ANTLabs **Gateway Server**, a key solution in network access management for hospitality and enterprise networks.
- Acted as the first line of technical support for ANTLabs products, with a focus on **diagnosing** and **resolving issues** related to the Gateway Server.
- Conducted advanced **log analysis** and **troubleshooting** using **Linux/Unix commands** to identify and resolve network-related problems.
- Delivered remote customer support and customized Gateway Server configurations to meet unique client network requirements.
- Collaborated with network team to **escalate and resolve complex WAN/LAN connectivity issues** in enterprise environments.

Alorica - Service Desk Analyst

January 2018 - December 2019

- Provided IT support for enterprise users via Citrix, VPN, and ServiceNow
- Provided technical support in a corporate setting, handling user account management and troubleshooting WFH users remotely via Citrix.
- Managed user accounts and rights through **Active Directory** and created tickets in **ServiceNow** for issue tracking.
- **Troubleshoot issues** in VPN and Citrix environments, **providing solutions and escalating unresolved cases** to IT Specialist.
